EVERYTHING POSTPAID THROUGHOUT THE MIDWEST

You will see that everything in this catalog is delivered to you postpaid if you live in a radius of 600 miles of Shenandoah (see Page 65). This represents a real saving to you. Since postal rates have gone up considerably this past year, we must ask, however, that customers outside this 600-mile circle add 10% to the price of their nursery orders only to help pay this increased postage. As usual, seeds, vegetable and house plants, bulbs and other items in this catalog, unless specifically marked, come postpaid. 10% postal charge applies only to nursery items (hedges, fruit and shade trees, shrubs, ornamentals, etc.) and then only if you live outside the area marked on the map at the left.

EASY TO ORDER

Just list what you want on the enclosed order sheet or on any sheet of paper. Please write your name and address plainly, giving rural route or street address. Also, if your express station is different than your postoffice, list the express station, too.

NOTICE: If a Federal Sales Tax is passed between catalog printing time and the time you order, add it to your remittance, please.

The gentleman on the right should be introduced, I think, because we hope he will some day be the third generation of our family in this business. He's Edward May, Jr., and he'll be just a little over 6 months old when this catalog goes to press. We're really proud of him (like all parents). His sisters Annette and Karen are very pleased with having a younger brother . . . they insist he's more fun than dolls!

Some Notes About Ordering From This Catalog:

We are thrilled anew every year by the number of our friends who honor us with orders. We cherish this trust you place in us, and will continue to do our level best to merit your confidence. We are grateful for every order, large or small. But it has occurred to me that if I could tell you something about the way we handle your orders, you could help us speed them to you faster, and with as few mixups as possible. So my letter this spring will cover how you and we here at Shenandoah can work together.

First, there's the money you send us. Your personal check is always welcome, or you can send a bank draft or a money order. If you send currency, please wrap it carefully (it would be safer if you'd register your letter). We'd much prefer it if you would not send stamps, as we're not set up to handle them easily.

Your shipment might not always reach you in one package, since seeds and nursery stock must be shipped separately. Then, too, your strawberries will be shipped from eastern Iowa . . . Iris from Colorado, etc. House plants must travel separately, as must evergreens. We'll be real careful to see that everything reaches you in perfect condition and at the proper planting time, so don't be alarmed if only a portion of your order arrives in the first package you receive from us.

You'll notice most items in the catalog are priced singly and in groups of 3, 5, 6, 12, 25, and so forth. It will help us get your order to you quickly and correctly if you will please order in the groups listed in the catalog.

This catalog is crammed full of top quality merchandise, as always. Since this is our biggest catalog of the year, it contains lots of items not listed in the Fall Catalog. Save this catalog . . . use it to order those items suitable for planting in the Fall but not listed in our later catalog because of lack of space.

Finally, please order early. We think we have ample stocks of everything, but we're bound to run out of some things as the season progresses. So to be sure of getting what you want, when you want it . . . order early! Then, too, the fine premiums listed on pages 19 and 27 are given you without charge when you order early. Don't forget to include them on your order.

Again, I wish to thank you for your fine orders. It is always a pleasure to serve you. On behalf of all of us here at May Seed Company, I hope you have a most happy and prosperous 1955.

Sincerely,

Edward May

And, they are about the easiest of all house plants to grow. You can plant your Gloxinia bulbs from February until late May and have a succession of flowers.

Use a 5-inch pot and get good rich sandy loam. Plant the bulb about one inch deep. Place it in a warm sunny window. Water it sparingly until growth appears and then water every day. After flowering the bulbs should be saved for planting another season and so on for many years. Here are four of the finest.

**GERMAYTREATED AND
TRIPLE TESTED**

*The ideal combination for
Vegetable Garden Success!*

Our Garden Seed program is designed with one thought in mind: to bring our customers the finest seeds we can. We've developed two important steps toward that end:

First, TRIPLE-TESTING. Earl May garden seeds are tested in our laboratories, where trained experts test for purity and germination, using scientifically-designed equipment. Next, they're tested in our 76-Acre Test Gardens, where both new and old established strains and varieties are grown, measured, weighed and accurate records are kept as to length of maturity, reactions to climate, productivity, characteristics. Then, the vegetables themselves are tested on our tables; our families pass on flavor and texture. The varieties that rank high in these tests are offered for sale to our customers.

The second part of our program is the GerMAY-treated process; a scientific treatment that protects seeds against destructive soil-borne organisms. It promotes better germination under adverse soil and weather conditions. The GerMAY-treated process is transparent . . . does not change the color of the seed. No poisonous metallic compounds are used in the process. Tests have proved GerMAYtreated is entirely non-toxic and non-irritating.

We have marked the GerMAYtreated vegetables on the following pages. Look for the GerMAY-treated symbol: another example of our continuing research to bring you better things for yard and garden.

A great yielder, wonderful flavor and tenderness. *Our Hybrid Stowell's intensifies these fine traits. Sweeter, more tender and the highest yielding of all the sweet corns.* The giant ears are 8 to 10 inches long, snowy white and very, very deep grained. A fine corn.

**34 ONIONS
 TO THE BUSHEL!**

We thought a bushel of 41 onions weighing 50 lbs. was a good record . . . until Lyle Vosburgh of Sycamore, Illinois sends this picture of 34 onions overflowing a bushel basket . . . and weighing 57 pounds! Both records came from our Yellow Sweet Spanish plants, and thousands of our customers get sensational yields each year. But order early—they must be planted early to make the big size.

Easy to plant. Easy to grow. And they make tremendous yields of big, mild, sweet onions.

Once you've seen and eaten fine big onions grown from plants, you'll always plant them. Light frosts and freezes, even a light snow, won't hurt them. So, you can put them out extra early to get a full growing season. Plant them about 1½ inches apart. The first time you thin them out for "green" onions. The next thinning for stewed onions. Then, let the rest go on to make you plenty for fall and winter use. We have the two best-by-test varieties: **WHITE BERMUDA**, the mildest you've ever eaten, and **YELLOW SWEET SPANISH**, a wonderfully mild onion that keeps for months! Both must be planted early if you want the most and best for your money. So, order early. We'll ship at the right time.

Hamilton, Missouri

This is the fourth year that we have ordered May-Way chicks. We think they are the best we've ever raised. From the 200 or 300 each year we only lost 2 or 3 and they come into production so much earlier than chicks we get here. We liked the Leg-Hamps so well.

Mr. and Mrs. Roy McKee

Lineville, Iowa

I seldom write this type of letter but I do feel that the extra quality of your baby chicks deserves praise from all who benefit by ordering them. I have certainly been more than pleased with the chicks I have ordered from you and I can truthfully say they look better and develop better than any I have had in the past from other hatcheries.

Mrs. Bedford Ross

Beatrice, Nebraska

I am writing to you as I want you to know I am a well pleased customer. I bought some chickens from you this Spring at your Beatrice Store. I got 100 New Hampshire pullets and 300 straight run of the best grade. They are now 6 months old and in laying production. These are the nicest chickens we have ever raised. They were all very healthy and we raised all of them except a very few. We had chickens that weighed over 2 lbs. at 7 weeks of age.

John J. Aden

Chula, Missouri

I ordered 300 Best Grade Austr White pullets last year. I received 304 chicks, only four roosters. We put 295 in the laying house in September. They started laying before they were four months old. At four months and a half we were getting around fifty eggs a day. They are the largest and best chicks we have ever raised.

Mrs. Roy Brown

Van Wert, Iowa

My May-Way chicks are doing fine. I bought them in May and the biggest part of the pullets are laying. Only fault I see is they lay so many double eggs, I get to eat 2 eggs for one. My pullets are White Rock, and they are very large birds.

Mrs. D. V. Cox

Lenox, Iowa

I got 300 straight run chicks last year and 100 cockerels. May-Way chicks of course. Grow . . . I never raised chicks that grew so fast. I was unable to get my chicks until late but that wasn't a drawback. The pullets started to lay around Christmas and the extreme cold weather never cut their production one bit. They are laying 80% now and the temperature is below zero. I am very well pleased and enclosed find my order for this year's chicks.

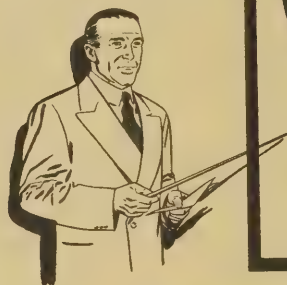

Mrs. Jess Haggerty

Red Oak, Iowa

Last year my Mother ordered 200 Austr White chicks. They all lived and today are laying more eggs than any we have ever had. I have 50 of these pullets on my place. They have been laying 35 to 40 eggs a day, very large eggs, too, and that is what I like. I want these same chicks this year so please send me price list or catalog.

Mrs. Howard D. Keim

LOOK AT THIS CHART!

Poultry Population Goes Down As Human Population Goes Up. This Means

GOOD FARM OPERATORS CAN CASH IN...IN 1955!

Low egg prices will scare a lot of farmers out of poultry raising. If only one tenth of current chick-raisers do not have chickens next year, it will bring about the largest decrease in poultry population since World War III!

And that should establish the highest egg prices in history!

The Chicks You Start Now Will Not Be Laying Until Fall

Most efficient farm operators realize that the time to stay in production is when others are getting out. A dwindling poultry population, in the face of increasing human population (and food consumption) cannot help boosting egg and poultry prices next fall . . . **the very time this Spring's baby chicks are reaching peak production!**

You have your housing and brooding equipment. Put them to work this Spring . . . fill them with Baby Chicks . . . U.S. Approved, U.S. Pullorum-Passed MAY-WAY Baby Chicks!

May-Way Chicks are Guaranteed by the Earl May Seed Co.

The Earl May Seed Company is supplying chicks to its second generation of satisfied customers. They stand behind the chicks they sell, just as they are responsible for your satisfaction when you buy seeds or nursery stock. Thousands of midwestern poultry raisers turn to May-Way automatically when they think of quality in fine baby chicks. A reputation like that is not built overnight.

Thrifty "PLUM ORCHARD" Collection

The Plum is our hardiest, most dependable fruit. But remember, plums like company of their own kind. They need company, too, because it is cross pollenization that makes great yields. While Concord is essentially a northern grape, it can be grown in the South, too. We'll send you healthy, heavy vines from outdoor grown stock. Guaranteed to please you.

TOP CROP

105. (50 days.) All-America winner in 1949 and an outstanding star in our Test Gardens this year! The plants make a vigorous growth and set an unbelievably big crop. The pods are long and round, meaty and really stringless. Can't be beat for flavor and tenderness. The big yield comes on during a short period, so you make a few big pickings instead of numerous small ones. The seeds inside the pod of TOP CROP develop slowly, making an extra thick and meaty pod. They are still tender and stringless after others would be tough and useless. No matter what other green beans you have in your garden, be sure you plant TOP CROP this year. It's a winner. Big 3-oz. Pkt. 15c; 1/2 lb. 40c; lb. 65c; 2 lbs. \$1.15, Postpaid.
